International Journal of Materials Science and Applications (IJMSA) is an interdisciplinary journal devoted to experimental and theoretical research on the synthesis, structure, properties and applications of materials. Particular interest is placed on materials having relevance to microelectronics, photonics and micromachining. IJMSA welcomes the following tier 1 article types: Book Review ...

Jeff Stansbury . While working as a chemist on polymeric biomaterials at the National Institute of Standards and Technology, Jeff Stansbury received his PhD in organic chemistry from the University of Maryland (1988) with thesis work based on single and double ring-opening polymerization using both free radical and cationic pathways.

Free Text Materials Letters has an open access mirror journal, Materials Letters X. Aims and Scope Materials Letters is dedicated to publishing novel, cutting edge reports of broad interest to the materials community. The journal provides a forum for materials scientists and engineers, physicists, and chemists to rapidly communicate on the most important topics in the field in materials.

### **Guide for authors - Materials Letters - ISSN 0167-577X**

The interdisciplinary field of materials science, also commonly termed materials science and engineering is the design and discovery of new materials, particularly solids. The intellectual origins of materials science stem from the Enlightenment, when researchers began to use analytical thinking from chemistry, physics, and engineering to understand ancient, phenomenological observations in ...
